

Turei Milner

Full Stack Developer | Auckland, New Zealand

milner.turei@gmail.com | linkedin.com/in/turei-milner-2682b5361 | github.com/Turei-hub

PROFILE

Career-changing developer who went from tree felling and construction to building full-stack web applications. Currently completing a Level 5 Diploma in Full Stack Development at Mission Ready HQ (Auckland). Brings a trades mindset — ownership, problem-solving under pressure, and delivery — to every project. Focused on AI integration, clean UX, and real-world impact. Te reo Māori speaker. Actively seeking a sponsored internship.

EDUCATION

Level 5 Diploma in Full Stack Development

Mission Ready HQ — Auckland, New Zealand

2026 (in progress)

Full-time, in-person programme covering JavaScript, React, Node.js, Express, MongoDB, Docker, cloud architecture, and AI integration.

PROJECTS

Zina — AI Road Trip Planner for Z Energy

Team Capstone Project | Mission Ready HQ

2026 · React · Vite · Node.js · Express · MongoDB · Gemini API · Google Maps API · Docker · Jest

- Built the full AI chat interface (ChatPage) featuring Zina character UI, chat bubble layout, and centred input bar.
- Integrated Google Gemini API for AI responses with voice input (STT) and text-to-speech (TTS) via Web Speech API.
- Built BriefFormPage — the road trip brief form that feeds user inputs into the AI planning pipeline.
- Served as team Git lead: set up the repo, managed branches, handled merges, and resolved a critical security incident by scrubbing accidentally committed credentials from history using git filter-branch.
- Wrote 28 passing Jest unit tests across three test files.
- Designed a full Docker containerisation plan for frontend (Vite/Nginx) and backend (Node/Express).

LAE Engine — Layered AI Engine

Personal Project

2026 · Python 3 · OpenAI API · NumPy

- Designed and built a multi-agent AI pipeline where three specialised agents chain together to take a high-level goal and produce an actionable output.
- Architecture: Macro Agent (strategic plan) → Quantum Agent (lateral idea) → Micro Agent (concrete action).
- Core agent logic complete; OpenAI API integration in progress.

Hangi Docker — React/Vite Application

Mission Ready HQ | Team Project

2026 · React · Vite · JavaScript · CSS

- Contributed to a Dockerised React + Vite frontend application built as part of the advanced level diploma programme.

Python CLI Tools

Mission Ready HQ | Course Projects

2026 · Python 3

- Basic Encryption Tool — command-line encryption utility built in Python.
- Python Calculator — terminal-based calculator demonstrating core Python fundamentals and input handling.

TECHNICAL SKILLS

Languages	JavaScript, Python
Frontend	React, Vite, HTML5, CSS3
Backend	Node.js, Express
Databases	MongoDB, Mongoose
AI / APIs	Google Gemini API, OpenAI API, Google Maps API, Web Speech API (STT/TTS)
DevOps & Cloud	Docker, GitHub Actions, Google Cloud
Testing	Jest
Tools	Git, VS Code, npm
Learning	Python (advanced), PowerShell scripting, Cloud architecture, Quantum computing concepts

ABOUT

Originally from a trades background in tree felling, construction, and bushcraft. That hands-on world built the ability to solve problems under pressure and take ownership of outcomes — skills brought directly into software development. Te reo Māori speaker, proud of Māori heritage. Father building a legacy in tech.
